

Competition Questions

SC>2020.2

- 1. Can we provide other options, in relation to positioning of the rooms other than what is being asked for in the brief or are they fixed?**

Yes, it is possible. Moreover, there may be the need to fine-tune the winning entry, too, so the entries are not necessarily final. Of course, objectives such as the separation of public and private space and other similar requirements should be considered as essential.

- 2. What is meant by "splitting of room for one way mirror and storage room"? Is there a specific use/therapy which we should take into consideration?**

Yes, there is a specific therapy method involving the use of one-way mirrors.

- 3. How much detail is expected in the cost estimate? Is it sufficient to follow the categories listed in Annex 3, without a further breakdown?**

There is no need for a detailed breakdown at this stage. However, the workings may be requested by the Jury if it feels the need to look into the estimate further.
